

Why is it that politicians are always talking about "freedom" in America and then turn around and try to restrict some "freedom" because someone some place does not like what someone else is doing. Please do not limit any media's ability to broadcast what I want to watch or listen to. You don't tell the newspaper what to print and not to print.

I have abandoned regular local radio because of its bland unimaginative safe format. That is what I have chosen with my Freedom. I have voted with my purchase. Keep the "free market" Open and let satellite radio be free to broadcast what the public wants. Please reject NAB's petition 04-160. If local radio stations want to keep listeners they will have to earn them just like any other business. If they can do local traffic and weather better then let them and the consumers will follow. I prefer to pay for a product I feel is better. Don't restrict my freedom!
